With more than 20 years of experience in the information technology industry, I've worked in fast-paced environments demanding organizational, technical, and interpersonal skills. My technical skills are supplemented by my analytical and business skills and knowledge of digital media, business process workflow automation, web design & development.

EXPERIENCE

HighPower Data Solutions, Champlin — *Sr. Web Engineer*

Aug 2022 - Current

Developing robust WordPress ecosystems at HighPower Data Solutions, with a focus on seamless API integrations and custom data-driven workflows. Ranging from custom business sites to complex integrations with Airtable, FileMaker, and various third-party APIs.

fjorge, Mpls — *CMS Managed Services Developer*

Sept 2020 - Nov 2021

Built an ongoing partnership with clients and with their live properties. Ensuring that their property is secure, functioning as intended, updated with current technology versions, and is able to evolve with the business it serves. Un-complicating the world of technology by making gradual improvements to our client's code, and by forming human relationships with clients to help make the world of technology feel less complicated for them.

MPLS Convention Center, Mpls — *Digital Signage Tech*

Apr 2019 - AUG 2020

Provided events access to their state of the art digital signage displays throughout the building. From custom video walls to high speed fiber connections, we made sure all events were beyond satisfied.

Faithful+Gould, Mpls —Sr. Systems Consultant

Oct 2013 - Jan 2018

Implemented, customized, managed & maintained a project life–cycle management program, called Unifier, for large industries around the world. A customizable automated business process workflow system.

Enstoa, NYC — *Associate Project Controls Solution Specialist*

May 2013 - Sept 2013

Managed cost control & scheduling of multiple capital projects through the implementation of the software application, called Unifier.
